About this license

Ravager is an original typeface designed by Arifin St, released through Pulpenitem Studio. It was built with FontSeru, a browser-based type design studio, and is made available under a Personal License as set out by the designer below. This document is a plain-language summary of that license; the terms here reflect what the designer has authorized for this font.

Under this Personal License, Ravager may be used for non-commercial purposes such as personal projects, hobby work, school assignments, and other uses that do not generate revenue or serve a commercial or promotional purpose. For commercial use, please contact the designer to obtain a Commercial, Corporate, or Extended License. Reselling, sublicensing, or redistributing the font files themselves, modified or unmodified, is not permitted without the designer's prior written consent.

This summary does not constitute a complete legal agreement. For questions about licensing, extended usage rights, or commercial arrangements, reach out to the designer at pulpenitem.my.id. Copyright © 2026. All rights reserved unless otherwise granted under this license.
